In this case study, CPL Business Consultants assessed the markets where supercritical CO₂ (scCO₂) extraction technologies would have an advantage over other technologies and where there was potential for growth. Additionally, CPL reviewed the current providers of scCO₂ extraction services and their offerings to the market.

OBJECTIVE

The objective of this study was to assist a company in gaining a greater understanding of the supercritical CO₂ extraction market.

METHOD

Information was obtained from over 250 published reports and over 100 sources. These data were reviewed and summarised for 85 companies which included full profiles for 37 scCO₂ manufacturers (17 in Europe, 12 in North America and 8 in Asia Pacific). Additionally, some further information was obtained from key contacts at these companies.
