OBJECTIVE

The objective of this study was to provide support for a client in its due diligence of an added-value soy protein ingredients company serving the animal feed sector.

CPL provided an assessment of the target company's products, IP, the competitive environment, risks of substitution and other risks to the business. We also reviewed the company's trials and marketing data and made suggestions of new product applications and new markets it could target. CPL's client subsequently made an investment in the company.

METHOD

Our research was carried out using in-house databases and external sources, including patent databases, industry reports and statistics and interviews with customers and competitors.
